Fares above are the lowest levels for fare types generally used for leisure travel.

Sample data from the Harrell Associates H100 Airfare Report

Notes:

WoW = week over week; **YoY** = year over year.
Airline Codes: AA: American; DL: Delta; UA: United
Airports: Fares are for the airport with the most non-stop flights.
 Most fares are filed city specific rather than airport specific.
CHI = O'Hare; **NYC** = LaGuardia/Kennedy; **WAS** = Reagan/Dulles

Leisure Fares: Lowest fare generally used by the leisure traveler.
 These fares are highly restricted in terms of advance purchase, penalty, minimum stay, etc. All fares shown are one way.
Cost per mile (CPM) is based on DOT route mileage.
 CPM % Through range shows the relative position of the

cost per mile as compared to the Min and Max levels for the trip length type, Short, Medium, Long, etc.
Trip Length Type Detail: S = Short: 650 miles or less
 M = Medium: 651 - 1,000 miles; L = Long: 1,001 - 1,750 miles
 T = Transcon: 1,751 miles or more.

The full Harrell H100 family of reports tracks:

- Nearly 300 major routes every week for most major airlines
- 40 top routes for each airline
- Over 30,000 business and leisure data elements per month

Harrell data capabilities:

- Year-over-year detailed pricing data that is hard to find
- Financial planning models — pricing, yield, investing
- Custom reporting available
